

# WEB Based Application Development-Tutorial

1. Create the following Registration Form and display the values of the input fields as shown below using HTML, CSS & PHP.

## Registration Form

First Name:	<input type="text" value="Kamal"/>
Last Name:	<input type="text" value="Perera"/>
Username:	<input type="text" value="Perera.k"/>
Password:	<input type="password" value="...."/>
Gender:	<div><input checked="" type="radio"/> Male <input type="radio"/> Female</div>
Academic Year:	<input type="text" value="2nd Year"/>
Email :	<input type="text" value="test@gmail.com"/>
Phone No :	<input type="text" value="077123456"/>
<input type="button" value="Submit"/>	

Once the submit button of the Registration form is clicked, the output should display like this

<b>First Name</b>	Kamal
<b>Last Name</b>	Perera
<b>Username</b>	Perera.k
<b>Password</b>	1234
<b>Gender</b>	male
<b>Academic Year</b>	second_yr
<b>Phone No</b>	077123456
